HOW TO USE TABBED  
PHOTO MATS  
with the corner tabs

1. Fold the desired mat to your page, allowing  
approximately 1 cm (3/8 inch) between individual mats.  
Adjust as needed so that the desired face is visible from under  
the adjacent mat. (DO NOT REMOVE THIS TOP  
PART AT THIS POINT)

2. Add an empty photo frame (found nearby below).  
Adjust size of empty photo frame to fit within the  
mat.

3. If the corner tabs are desired, add them on top of  
empty photo frame. Further adjustment of photo  
frame may be necessary to fit within the corner  
tabs.

4. Drop the photo you wish to use in the empty  
frame.

5. Select the mat, photo and corner tabs (if used)  
and remove from page.

6. Repeat, before the desired position on page.

7. Add drop shadow if desired.

## Embellishments
